QUICK FACTS

Degree	**BA Economics**
Expected Grad	**July 2028**
CGPA	**3.7+ / 4.0**
Languages	**3**
Status	**Open to internships**

SKILLS

Programming & Data

Scripting, data querying, and analysis.

Python · SQL · Java · C++ · Excel

Web & Systems

Building and understanding modern digital systems.

HTML · CSS · JavaScript · Software Architecture · Odoo

Economics & Analysis

Academic training in economic theory and quantitative methods.

Econometrics · Statistics · Research

Networking

Foundations of IP addressing and subnetting.

IP Addressing · Subnetting

LANGUAGES

Amharic — Native

Afan Oromo — Advanced

English — Advanced

PROFILE

Third-year Economics major (CGPA 3.7+) with a strong technical foundation in Python, SQL, Java, C++, Excel, and web development. Open to internships in banking, insurance, and NGOs.

I am a third-year Economics student at Addis Ababa University, School of Commerce, maintaining a CGPA above 3.7. My interests sit at the intersection of economic analysis and technology — using data and software to solve real business problems.

Alongside my degree, I have built a strong self-taught IT foundation through professional certifications in software architecture, strategy and innovation, CRM automation with Odoo, networking, and remote sensing. I am fluent in Amharic, Afan Oromo, and English.

I am currently seeking internship opportunities in banking, insurance, and development organizations where I can contribute analytical and technical skills while growing professionally.

EDUCATION

Addis Ababa University, School of Commerce

BA in Economics · Expected July 2028

CGPA: 3.7+ / 4.0. Relevant coursework: Econometrics, Statistics, Financial Accounting, Development Economics, Research Methods.

Saint Joseph School

Ethiopian University Entrance Examination (EUEE) · Graduated 2024

Ranked in the top 5% of the class throughout secondary education.

PROJECTS & RESEARCH

Cybersecurity Research Paper

Research · Cybersecurity

Independently researched and authored a paper on cybersecurity concepts and emerging threats (2023). Strengthened analytical writing and technical research skills.

Inventory & Accounting Software

Software · Accounting

Designed and developed a custom inventory and accounting system for Alsen Pharma PLC to streamline stock tracking and financial record-keeping.

Fintech Experiments

Fintech · Python · Data

Self-driven passion projects exploring digital payments, financial data modeling, and tools at the intersection of economics and finance.

Utility Development

Automation · Python · Tooling

Built small utility tools and scripts to automate everyday tasks — from file organization to data conversion and workflow helpers.

AI & ML Explorations

AI · ML · Prompting

Hands-on experiments with machine learning models, prompt engineering, and AI-assisted applications for practical use cases.

Personal Website

HTML · CSS · JavaScript

Built this responsive personal website from scratch using HTML, CSS, and JavaScript — hosted for free on GitHub Pages.
